

# DAVELES

FENCING IN FAST-FORWARD

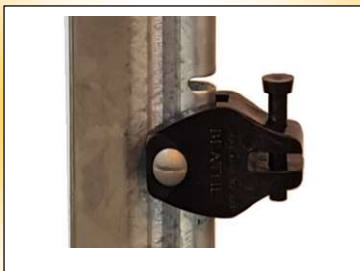

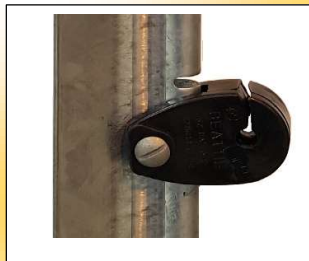

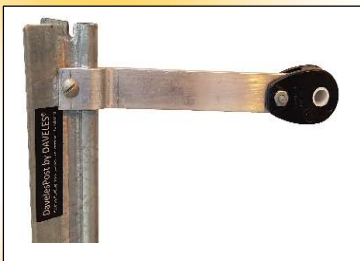

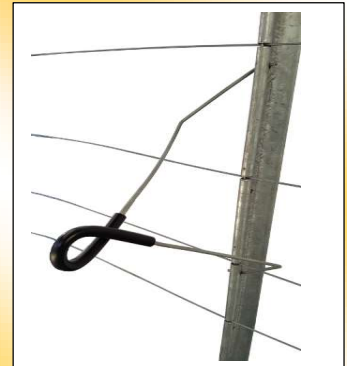

Our “Smartpost” range, save’s you time. The Daveles system does away with the frustration of threading and re threading fence wires. The Daveles system is great for netting and uses no clips. Just one drop-in retainer wire secures all fence wires at once.

“Smartposts” are a premium product and are Zinc coated (Z-450) to ensure it will last longer in the elements. This strong rigid design is 2kg/mtr weight.

- Smartposts are ideal for new fencing & repairs to tired fences. **No Clips or Lashing Required.**
- Smartposts significantly reduce the time needed to erect a new fencing.
- Smartposts can be customised to fit almost any spacing between wires at no extra cost.
- Smartposts come in varying lengths and slot configurations from **1.25 to 2.7mtrs that are very competitively priced!**

Daveles recommend and can supply Beattie insulators to provide quality fittings for electric fencing. The Beattie range is made in New Zealand and has a reputation for long life a high quality.

Standard outrigger insulators attach securely to the post

Daveles is a registered trademark. Daveles steel Smartposts have design registrations & patents pending in New Zealand and Australia. Daveles is backed by Smartweld Limited (2006), supplying the local businesses with engineering solutions and spring manufacturing products for the garage door industry.
